

W26LC WALL MANTEL AND BASE ASSEMBLY AND INSTALLATION INSTRUCTIONS

IMPORTANT: Read entire instruction sheet before assembling or installing mantel kit.

This mantel is only approved for use with any DESA Heating Products 26" gas or electric fireplace system. Do not use mantel with any other product.

This mantel kit contains the following:

- Mantel pieces - unassembled and marked as follows:
 - #1 Base
 - #2 Right Side with arrow
 - #3 Right Front Leg with arrow
 - #4 Left Side with arrow
 - #5 Left Front Leg with arrow
 - #6 Header with arrow
 - #7 Top
 - #8 Right Front Corner
 - #9 Left Front Corner
- Hardware Kit*

6 - Metal Brackets	118937-01
12 - Screws M6 x 12 mm (1/2")	121149-01
21 - Screws M6 x 30 mm (1 1/4")	121335-01
21 - Washers M6	121336-01
1 - Allen Wrench	121337-01

*Extra hardware may be included.

- Perimeter Trim Kit 113140-02 (GAB6094)

If any wood pieces are missing or damaged, contact the dealer where you purchased this mantel for replacement. If hardware is missing or damaged, contact DESA Heating Products at 1-866-672-6040 for referral information. You can also visit DESA Heating Products' technical service web site at www.desatech.com.

Note: Gather all mantel pieces together before assembling mantel.

WARNING: Use only 1/2" screws to attach metal angle brackets. Damage to mantel will result if other screws are used for this purpose.

ASSEMBLING MANTEL

IMPORTANT: More than one person is required to assemble and lift mantel.

Estimated assembly time: 30 minutes.

When assembling mantel do not tighten screws completely until told to do so. There should be some play in the pieces to allow for proper alignment and best possible fit. It is very important that more than one person assemble mantel together. Panels must be held in proper alignment to each other while tightening screws to assure fewer gaps and proper surface alignment. When tightening screws, do not over tighten. This may cause threads to strip. For this reason, the supplied Allen wrench should be used rather than a power screwdriver. Panels have threaded inserts installed at screw locations. Screws should start and turn easily in threaded holes when assembled according to instructions. Do not force screws into holes.

IMPORTANT: There is a serial number label inside of right side panel and on outside package. When calling to request technical assistance or for replacement parts please have that number ready.

LEG ASSEMBLY

1. Lay right side panel (#2) face down on a soft surface to avoid marking finish. Attach right front corner (#8) to side panel with three $1\frac{1}{4}$ " screws with washers as shown in Figure 1. Attach leg front (#3) to front corner (#8) with three $1\frac{1}{4}$ " screws with washers as shown in Figure 1.
2. Assemble left side (#4), left leg (#5) and left corner (#9) as described in step 1.
3. Attach 6 brackets to base (#1) at threaded hole locations using $1\frac{1}{2}$ " screws leaving screws loose. Face brackets toward outside (see Figure 2).

Figure 1 - Leg Assemblies (right side shown)

Figure 2 - Leg Assembly to Base

4. Place right side/leg assembly on base and align threaded holes with brackets. Start $1\frac{1}{2}$ " screws through brackets into threaded holes in side/leg assembly. Back of side/leg assembly should be flush with back of base. Assure alignment is correct and spaces are at a minimum and tighten leaving screws slightly loose.
5. Assemble left side/leg assembly to base (#1) following step #4.

HEADER ASSEMBLY

With arrow pointing up, place header (#6) into position on top of leg assemblies and against front corner pieces (see Figure 3). Start two $1\frac{1}{4}$ " screws with washers through each end of header and into front corners. Hold header in proper alignment with leg assemblies and tighten, leaving screws slightly loose.

Figure 3 - Attaching Header

MANTEL TOP ASSEMBLY

Place mantel top (#7) on mantel assembly. Align back of top with back of sides. Using four 1 1/4" screws with washers, place two in each mantel side assembly (see Figure 4). With one 1 1/4" screw with washer, attach top to header. Make sure all pieces are aligned properly and tighten, leaving screws slightly loose.

Figure 4 - Attaching Mantel Top

FINISHING MANTEL

Starting with left side leg assembly, tighten screws using Allen wrench provided. Tighten screws on the right side leg assembly, header, top assembly and base.

GAS FIREPLACE INSTALLATION

1. Fireplace should be fully assembled. See Assembling Fireplace in fireplace owner's manual.
2. Place mantel base close to installation location. See fireplace owner's manual for installation clearances. Leave enough room to insert fireplace from back of mantel.
3. Install gas line. See Connecting to Gas Supply in fireplace owner's manual. Remember to leave access to the gas shutoff valve somewhere on the base or where it is accessible to the user.
4. Check for leaks. See Checking Gas Connections in fireplace owner's manual.
5. Position fireplace inside mantel (see Figure 6). Carefully position gas lines. Important: Use caution when positioning fireplace on base. Base may scratch easily. Make sure fireplace is in proper position within mantel opening before continuing with installation.
6. **Fireplace with louver door:** Lower bottom louver door. Use two screws provided in hardware package and attach fireplace to wooden base. Close louver door.
Fireplace with fixed louver: Before installing logs or burner assembly (see owner's manual) remove screws securing floor to assembly. Lift floor for access to bottom of fireplace. Use two screws provided in fireplace hardware package and attach fireplace base to wooden base. Reinstall floor with screws removed previously.
7. If mantel trim has not yet been assembled, see Assembling Perimeter Trim, page 4. Place metal trim on shoulder screws. Firmly snap trim assembly over shoulder screws on fireplace.
8. Carefully push mantel and base into position against wall.

Figure 6 - Installing Fireplace

ASSEMBLING PERIMETER TRIM

1. Remove packaging from three pieces of metal trim.
2. Locate two adjusting plates with set screws, and two shims in the hardware packet.
3. Align shim under adjusting plate as shown in Figure 7.
4. Slide one end of adjusting plate/shim in slot on mitered edge of top trim (see Figure 7).
5. Slide other end of adjusting plate/shim in slot on mitered edge of side trim (see Figure 7).
6. While firmly holding edges of trim together, tighten both set screws on the adjusting plate with slotted screwdriver.
7. Repeat steps 2 through 6 for other corner.

Figure 7 - Assembling Trim

ELECTRIC FIREPLACE INSTALLATION

This mantel can be used with DESA Heating Products 26" Electric Fireplace. Electric fireplaces install from the front of mantel. To install electric fireplace see fireplace instruction manual. Use caution when positioning fireplace on base. Base may scratch easily.
